

COSMETIC TATTOOS

Before any cosmetic tattoo procedure the client must have had a consultation.

Eyeliner and brow combination treatments are available but clients would need a customised quote.

BROW CONSULTATION [30mins] **\$38**

Client and tattoo artist will meet to discuss colour / shape and desired outcome.

MICROBLADE BROWS [2hrs] **\$510**

For someone wanting a natural hair stroke tattoo to fill in gaps or eyebrows with compromised shape.

MACHINE/POWDER BROWS [2hrs] **\$550**

For someone wanting more of a makeup/full brow.

OMBRE BROW [2hrs] **\$560**

A combination of hair stroke and powder brow to achieve a natural but tailored finish.

EYELINER TATTOO [90mins] **\$480**

NIPPLE TATTOO [4hrs] **\$660**

For clients who have had reconstructive surgery and lost nipple colour or tone.

LIP TATTOO [3hrs] **\$660**

Suitable for a client who has lost lip pigment and wants full defined/contoured lip line and colour.

'PERFECTION VISIT' AFTER 4-6 WEEKS **\$150-\$400** [60mins - 90mins] Quotation during consult

'TOP UP' AFTER 8-12 MONTH **\$220-\$280** [60mins - 90mins]

SKIN TREATMENTS

SKIN ANALYSIS [30mins] **\$35**
Redeemable off product purchase

Digital Interactive facial scanning process for detailed skin analysis.

TRANSDERMAL / INTRODUCTORY FACIAL TREATMENT [60mins] **\$165**

A relaxing facial treatment using the mild range of DMK infusion to gently cleanse, exfoliate and hydrate. Great for clients wanting to try DMK treatments or clients that have not had any previous treatment.

DMK ONE [90mins] **\$185**

This treatment has many variations depending on individual client needs. The initial pre exfoliation will be discussed before the treatment commences and selected by your DMK Practitioner to target specific skin concerns, followed by the 'Famous Enzyme Therapy'. Known by DMK devotees as the 'Game of Thrones' facial, this treatment oxygenates, detoxifies and revises the skin to function as a young, healthy skin does. Utilising the beneficial effects of transfer messenger enzymes, it encourages blood circulation, oxygenation and the lymphatic drainage system while simultaneously, through reverse osmosis, helping flush away toxins and free radicals whilst stimulating collagen production. Formulated to be the basis of all DMK skin revision treatments to enhance optimal skin function, enzyme therapy works to create long-lasting results.

DMK ADVANCED [1hr 45mins] **\$195-\$220**

Suitable for clients who have already had previous DMK treatments and are on recommended DMK homecare prescriptions. DMK advanced therapy are stronger treatments to revise and reformat skin concerns, your DMK Practitioner will select at least two pro exfoliates, plus a combination of enzyme therapy-enzyme boost therapy and muscle banding technology. These treatments can be performed as a monthly maintenance treatment or they can be incorporated into a course to achieve fast and effective skin revision.

DMK MUSCLE-BANDING "MEGA LIFT" [90mins - 1hr 45mins] **\$195-\$220**

The ultimate treatment for age management, muscle banding is designed to target the muscles in the face and neck - tightening, toning and firming. With visible results noticed after just one treatment, this is a covetable treatment for giving a nice 'pop' before a big event, or for someone wanting to defy gravity. Allow your DMK Practitioner to create a perfect pre exfoliation to give your skin its youthful bounce.

DMK ACNE SOLUTIONS [60 - 90mins] **\$150-\$195**

Skin consultations are encouraged before revising problematic acne skin. DMK have a unique in-clinic treatment to target acne called alkaline wash. Alkaline wash swells, softens and dissolves to remove excess cell build up, effective skin resurfacing for pigmentation, scarring and it releases the inflammation and impaction to kill the acne bacteria. Expect the skin to become slightly worse before revealing a healthy functioning skin.

DMK ALKALINE & ENZYME HAIR REMOVAL [90mins] **\$195**

DMK's unique pain-free hair removal system targets fine hairs that laser struggles to remove. It gently dissolves the hair whilst also working to reduce hair re-growth with continued use - and can be used anywhere on the face or body. Your skin will be hair free and velvety smooth. This treatment can also improve conditions like ingrown hairs, folliculitis and acne affected skin through its hair removing capabilities and bacteria killing properties.

DMK (STAND ALONE) HAIR REMOVAL [45mins] **\$165**

Following alkaline and enzyme therapy, clients have the option to just treat hair growth. This is recommended every 4-6 weeks to remove and retard surplus, vellus hair from the face and neck.

DERMAPLANING INC ENZYME [1hr 45mins] **\$195**

DERMAPLANE (STAND ALONE) [60mins] **\$165**

A popular treatment using a small angled blade to manually remove subcutaneous dead skin cells and all vellus facial hair. This treatment is recommended alongside the DMK enzyme therapy, but not essential. The skin has no downtime and will appear silky smooth after just one treatment.

SKIN NEEDLING INC ENZYME [1hr 45min] **\$220**

(STAND ALONE) [60mins] **\$195**

The very latest technology in medical grade micro needling, this device gently glides over the skin using oscillating micro-needles to create micro-injuries that encourage the body's ability to repair itself. This stimulates the production of collagen and elastin which helps to plump, smooth and tighten skin. Particularly effective for uneven tone, visible signs of ageing, scarring, open pores and loose skin on the neck and jawline.

IPL PHOTO REJUVINATION [20min / 30mins] **\$110/\$220**

Using a highly efficient laser machine, we can address different skin conditions. Recommended for sun damage, pigmentation, acne and/or ageing, this therapy can be used on all parts of the body. When treating face or décolletage it can be incorporated into a DMK maintenance treatment or as a more intensive course. We recommend our digital skin analysis treatment prior to laser therapy.

DMK MEDI PEDI [60mins] **\$85**

(WITHIN DMK TREATMENT) **\$65**

WITH POLISH **+ \$20**

DMK's incredible solution to dry/cracked or callous feet. Alkaline wash is placed over affected areas and allowed to swell/soften and remove hardened dead skin. This treatment is like none other and will leave your feet smooth, soft and repaired. This treatment is offered during an enzyme therapy treatment or on its own.

BODY ENZYME THERAPY (PRICING ON QUOTATION)

To target specific body conditions, DMK's signature enzyme therapy treatment is specifically designed to encourage the body's skin to perform at its best. This unique solution is used to help revise cellulite, fluid retention, dry skin, crepe like loose skin, poor circulation, ingrown hairs, hyper-pigmentation, scarring, stretch marks and acne. If you have lost a lot of weight but still carry loose skin, a tailored program using DMK's Body Enzyme Therapy can help to tighten and snap the skin back into place! DMK creates skin revision treatments so you can love the body you live in. *Ask your DMK Consultant to quote specific body areas.*

SKIN REVISIONS & PRO PEELS

DMK SIX LAYER PEEL [30mins] **\$700**
2 applications over 2 days

For those who want significant and quick results but do not want to commit to invasive surgery or treatments, the Pro Alpha Six-layer Peel is ideal. An aesthetic approach to skin restoration, this peel restores the skin back to optimal health. The strength of the formulation is tailored by your Advanced DMK Consultant to suit your skin colour, texture, sensitivity and condition. In just 10 days damaged skin tightens, lifts and peels away to reveal younger-looking, smoother, optimally functioning skin. We recommend five days downtime after this procedure. Prior treatments and home care is essential.

DMK RP PEEL [30mins] **\$700**
2 application over 2 days

RP is designed to remodel the architecture of the skin and revise dysfunctional processes that have developed. Reconstructing and returning the skin to its original functioning condition, RP does more than just revise signs of ageing. This intensive peel is ideal for skin affected by acne, pigmentation, ageing, sun damage, scarring, and stretch marks, as it peels away the old skin and restructures the new skin from deep within.

MINI PRO PEEL [90mins] **\$240**

Pro Peel is a progressive resurfacing skin revision process using the same solution as the bigger peels - just applied for less time. It is for people who don't want the down time or have darker skin prone to hyper-pigmenting.

Combined with DMK's signature Enzyme Therapy masque, Pro Peel assists to re-energise sluggish, tired skin, while improving the function of the new skin. It gradually works to resurface the skin by removing old damaged cells and uneven, sun-damaged skin over a 6-8 week period. Good for hyper-pigmentation, thickened, uneven textured skin, congestion and open pores, or just for a nice freshen up.

TREATMENT PLANS

A course of treatments is always recommended for clients wanting to change or revise skin conditions. Maintenance treatments can follow, but to see quick and effective results your Skin Consultant will propose a course of individual-tailored advanced treatments to get you the best results.

Treatment plans must be purchased in one transaction.

MINI COURSE **\$600**

Course of 3 advanced treatments over 3 consecutive weeks.

PRO SKIN **\$1200**

Course of 6 advanced treatments over 6 consecutive weeks.

ADVANCED PRO SKIN **\$2400**

Course of 12 treatments over 12-24 weeks.
